# Your 2021 Speakers Include:

**Mark Talens,**  
AVP Supply Chain Management, Demand  
Fulfillment, Distribution & Logistics,  
**Organon & Co, part of Merck & Co**

**Vimalier Reyes-Ortiz,**  
Cold Chain Logistics Manager,  
**BioMarin Pharmaceutical Inc**

**Guadalupe Hayes-Mota,**  
Director Supply Chain,  
**Ultragenyx Pharmaceutical Inc**

**Harald van Weeren,**  
Team Lead Segment Manager/Segment  
Manager Clinical Trials,  
**Berlinger & Co. AG**

**Kevin Hickman,**  
Senior Manager, Supply Chain Distribution,  
**Gilead Sciences**

**Rafael Palma,**  
Supply Chain Manager,  
**AbbVie Inc**

**Arul Joseph,**  
Senior Director, Pharmaceutical  
Development and Clinical Supply Chain,  
**Avanir Pharmaceuticals**

**Dr Emre Gollu,**  
Supply Chain Associate Director,  
TR & MEA; ES Head EB TR,  
**UCB Pharma**

**Luiz Barberini,**  
Operations Manager - External  
Manufacturing Latin America Head,  
**Bayer**

**Mayank Batra,**  
Director Supply Chain  
& Operational Excellence,  
**Mint Pharmaceuticals Inc**

**Frank Leu,**  
CEO,  
**Novapeutics LLC**

**Sean Walsh,**  
Executive Director, Quality and Supply Chain,  
**Adlai Nortye**

## Who should attend:

Temperature Control & Logistics 2021 is designed for VP's, Presidents, Directors, Heads and Managers from:

- Supply Chain
- Cold Chain / Cool Chain
- Distribution
- Logistics
- Warehousing
- Freight / Transportation
- Quality Assurance / Control
- Temperature Control Management
- Clinical Supply
- Regulation, Compliance & Validation
- Operations & Strategy
- Innovation and Emerging Technology
- Packaging

Our sponsors include technology, service & solution providers specializing in:

- Supply Chain
- IoT Hardware, Sensors and Device Components
- RFID, Telematics, GPS, Track & Trace Serialization
- Data Loggers/Storage/Platforms/Collection/Security/Integrity
- Real-Time Asset Tracking & Temperature Monitoring
- Active & Passive Temperature Management
- Air, Sea, Road Freight
- 3PL / 4PL
- Thermal Packaging
- Storage & Containers
- IoT Platforms and Infrastructure
- IoT Applications
- Cloud Computing
- Cyber Security
- Machine intelligence/AI/Machine Learning/Blockchain

# Your 2021 Agenda:

**As we enter another incredibly challenging year for temperature-controlled supply chains, we are excited to announce our expert speakers who are successfully overcoming common obstacles.**

With this in mind; we will unite an exclusive selection of temperature control, supply chain & logistics specialists from leading Pharmaceutical and Biotechnology companies, technology suppliers and solutions providers to share their experiences, insights and perspectives on the cold chain.

Through a series of presentations and interactive discussions, you will acquire the necessary tools to:

Forecast future trends, challenges and opportunities within the temperature-controlled supply chain

Apply the latest technology and innovations to optimize your end-to-end cold chain

Manage the short, mid and long-term impacts of COVID-19 and vaccine distribution

Develop an agile, resilient and robust supply chain for a sustainable future

Improve efficiency and mitigate risks by implementing new processes, operating procedures and systems

Maintain pace with the evolving vendor landscape and create strong partnership-driven relationships with providers

**Here are just some of the amazing elements of our Virtual event experience:**

01

**Free access to ALL sessions and exhibitors**

02

**Interactive Virtual Roundtable Discussion groups where you can have your questions answered**

03

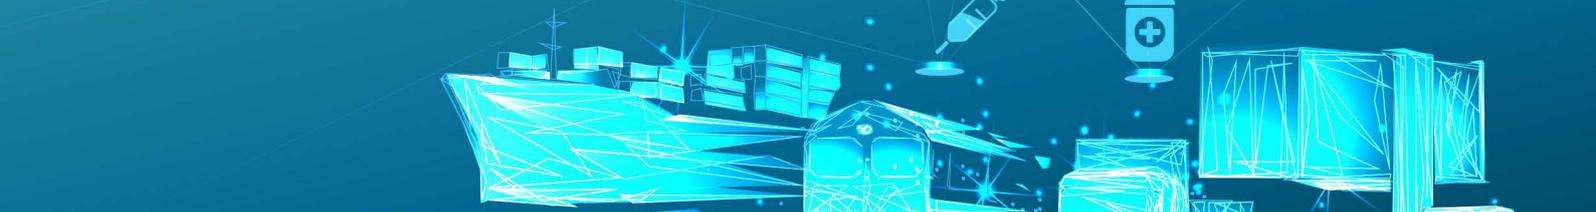

**On-demand access to all recordings after the event**

04

**Flexibility to select the sessions that are important to you**

05

**No travel costs and time spent away from the office**

# Agenda: 28 April 2021

All timings are Pacific Standard Time.

08:55-09:00 **Opening Remarks from AMG World**

09:00-10:00

Virtual Roundtable:

## Embracing the Next Generation of Pharma and Biotech Supply Chains

*This discussion will highlight the impacts caused by the COVID-19 pandemic, and how temperature-controlled supply chains must adapt to overcome these challenges and ensure customer demand is met.*

- The short, mid and long-term impacts of COVID-19 and vaccine transportation: What are the current and future impacts on pharma and biotech supply chains?"
- Developing sustainable supply chains: Ensuring agility, resilience and robustness in preparation for the future
- What options are available to overcome logistical and temperature sensitive challenges, when balancing delays and capacity limitations?
- Enabling clearer visibility of the end-to-end supply chain: How can we integrate processes and systems to improve efficiency and mitigate risks?
- Managing logistical complexities and infrastructure challenges: How to tackle the critical transportation of temperature sensitive products across widely contrasting geographical locations
- How to develop and convey clear lane SOP's for how to handle, manage and expedite inventory to mitigate risks of temperature excursions

### Panelists:

**Rafael Palma**, Supply Chain Manager, **AbbVie Inc**

**Guadalupe Hayes-Mota**, Director of Supply Chain, **Ultragenyx Pharmaceutical Inc**

**Vimalier Reyes-Ortiz**, Cold Chain Logistics Manager, **BioMarin Pharmaceuticals Inc**

**Sean Walsh**, Executive Director, Quality and Supply Chain, **Adlai Nortye**

10:05-10:35

## Streamlining your Clinical Supply with Digitalized Temperature Monitoring

- Exploring the current challenges in temperature monitoring in clinical supply
- Describing how these challenges are overcome with digitalized temperature monitoring
- How the integration of Berlinger SmartView Clinical Trial solution with IRT systems offers a full centralized visibility of your IMPs temperature profile and fit for use in an end-to-end manner

Presenter:

**Harald van Weeren**, Team Lead Segment Manager/Segment Manager Clinical Trials, **Berlinger & Co. AG**

10:35-11:00

## Networking Break and Virtual Exhibition

11:00-11:35

## Facilitating Temperature-Controlled Distribution in Challenging Environments: Partnership and Technology Working Together

- Understanding how to move temperature-controlled products from supplier to customer in challenging geographical environments
- Engaging with partners to overcome mutual restrictions
- Getting to grips with the complex regulatory landscape and compliance requirements
- Leveraging technology to optimize supply chain visibility and enhance service levels

Presenter:

**Luiz Barberini**, Operations Manager - External Manufacturing Latin America Head, **Bayer**

# Agenda: 28 April 2021

All timings are Pacific Standard Time.

11:35-12:05

## **Trends, challenges and opportunities in temperature controlled pharmaceutical supply chain and logistics**

- Impact of COVID-19 and vaccine logistics on the clinical supply chain
- Key considerations for a site-to-patient/ direct-to-patient model for temperature sensitive shipments in the new environment
- Maintaining supply chain integrity when managing geographically distributed sourcing, manufacturing, packaging, and distribution
- Strategies to pre-empt and mitigate risks with temperature sensitive investigational products

Presenter:

**Arul Joseph**, Senior Director, Pharmaceutical Development and Clinical Supply Chain, **Avanir Pharmaceuticals**

12:05-12:45

## **Networking Lunch and Virtual Exhibition**

12:45-13:50

## **Digital Innovation and Transforming Pharma and Biotech Supply Chains**

This discussion will focus on the recent technology evolution, how innovation can optimize temperature sensitive supply chains, and managing the vendor/supplier landscape.

- Leveraging technology and solutions: What suitable options are available right now to optimize the cold chain?
- What innovative technology is starting to emerge?
- Creating strong partnership-driven relationships with vendors and suppliers: How to encourage clear, direct and transparent communication
- How can technology achieve regulatory compliance and improve last mile visibility?
- What is the biggest barrier to innovation within the sector?
- Managing the mindset shift: How to drive change and instill a progressive approach to a technologically optimized supply chain

Virtual Roundtable:

### **Panelists:**

**Mark Talens**, AVP Supply Chain Management, Demand Fulfillment, Distribution & Logistics, **Organon & Co, part of Merck & Co**

**Kevin Hickman**, Senior Manager, Supply Chain Distribution, **Gilead Sciences**

**Dr Emre Gollu**, Supply Chain Associate Director, TR & MEA; ES Head EB TR, **UCB Pharma**

**Mayank Batra**, Director Supply Chain & Operational Excellence, **Mint Pharmaceuticals Inc**

**Frank Leu**, CEO, **Novapeutics LLC**

14:15

## **Close of the conference**

# How can you get involved as a sponsor?

You will be positioned as industry experts amongst the most prominent and influential players within the pharma and biotech cold chain. The Temperature Control & Logistics Event will offer maximum coverage and exposure to a highly engaged and motivated audience, providing a hugely exciting opportunity and platform for you to effectively position your brand whilst highlighting your capabilities to a wider US based audience.

## What will you receive as part of sponsorship package?

- ➔ A one hour closed door roundtable facilitation role with fully qualified delegates where you will moderate the discussion with qualified panellists
- ➔ 30-minute virtual presentation with both audio and visual content which is broadcast to a live audience within your target demographic, promoting thought leadership and generating quality leads.
- ➔ The opportunity to establish contact with qualified budget holders prior to the event to optimize the discussion and ensure your topic is aligned and your time optimized
- ➔ Virtual pre-arranged one-to-one meetings with qualified delegates that are actively looking for solutions to solve their problems.
- ➔ Thought leadership and brand awareness

We would welcome the opportunity to discuss various options in more detail, for more information please contact:
